

Mike C. Kynoch
Completion Engineer / Specialist

Date of Birth: 5 March 1958

Nationality: British

Education: Industry experience

QUALIFICATIONS AND EXPERTISE:

- Excellent knowledge of completion and testing equipment
- Background in technical and operations management for major completion contractor
- Considered an expert by many people regarding up-hole completion equipment
- Excellent team player and willingness to work with multiple disciplines and cultures
- Strong background in various workover and intervention operations
- Worked in many remote areas, especially in Asia

During the 5 years with DMI, has served as the completions engineer for Oxy in Yemen, Daewoo in Myanmar, GFI/Salamander in Gulf of Thailand and Apache/Roc Oil in China. He has been responsible in each area for designing, preparing equipment and materials, supervision of installations, and various functions relative to completions.

DMI considers the role of the completion specialist as vital to obtaining high performance on projects. The completion specialist is responsible for managing the completion service contractors and ensuring trouble free and effective installation of completions.

RECENT ACHIEVEMENTS AND CAREER HIGHLIGHTS:

Mike has worked on every DMI managed project that required completion or testing since joining the company in 2005.

Completion NPT in China ranged from 20-30% prior providing a Completion Superintendent to the team. Mike took over completions for Apache China in 2006 and achieved completion NPT < 3%, and has been maintained under 10% each subsequent year.

Developed completion skills with Baker Oil Tools over a 30 year career with increasing responsibility and recognized for technical expertise.

- High rate of successful installation with no problems or failures.
- Utilized extensively on major projects that required a higher level of expertise for problem wells, especially on blow outs, and high pressure conditions.
- Served as regional and country manager with responsibility to develop and train personnel, provide quality of service to operators, and manage operations and finances.
- Served as completion operation engineer to prepare procedures and provide specialist services.
